

Media Release

11th September 2020

FUTURE PROOF YOUR CAREER WITH NEW PROGRAM IN EMERGING TECHNOLOGIES

SAE Creative Media Institute is preparing its students for the jobs of the future with the brand new [Graduate Certificate of Emerging Technologies](#).

The Graduate Certificate of Emerging Technologies seeks to develop students' skills and knowledge in virtual and augmented reality, artificial intelligence for games, scripting and game development, 3D printing and prototyping, and microcontroller programming and development.

Designed for graduates with a bachelor degree or experienced professional practitioners, this course will develop students' knowledge and understanding of emerging technologies whilst expanding their cognitive skills to generate and evaluate complex technologies.

Fostering collaboration with fellow creative postgraduate colleagues, the Graduate Certificate of Emerging Technologies will bridge the increasing intersection of creativity and technology.

Dean of SAE Australasia, Dr Luke McMillan says SAE is excited to launch the Graduate Certificate in Emerging Technologies this September.

"With demonstrated success in delivering our virtual reality program earlier this year, SAE has a long history of developing students who seek creative and innovative careers. The program is a forward-thinking exploration of what may constitute standard information technology domains into the future."

"The program seeks to provide practical, hands-on skills in emerging technologies, for which there are reliable forecasts as to the future value to industry," Dr McMillan says.

Delivered online, the program will allow graduates to upskill their current qualification to accommodate future-focused fields. The program is also supported by the Australian Government's Commonwealth Supported Places (CSP) scheme. The CSP is a subsidy, not a loan, and does not have to be paid back.

The Graduate Certificate in Emerging Technologies is taking enrolments for September. To enrol, or to find out more please visit sae.edu.au

Interviews with Dr Luke McMillan are available upon request
